

SIMPLIFY. STREAMLINE. SECURE.

Managed Cloud w/ Microsoft Azure

We help SMBs who have **outgrown** their current IT infrastructure plan and navigate successful cloud transformation.

The cloud is not just for enterprises. Businesses of all shapes and sizes are moving IT operations to the cloud to reduce their tech footprint, streamline security efforts, and standardize—even reduce—ongoing IT costs.

With TheCompuLab as a partner—there’s no reason IT challenges or lack of internal expertise should stand in the way of your business growth goals. Our team of cloud experts can help augment existing IT resources and knowledge to support successful cloud transformations. **Is your organization looking to...**

- ⚠ Identify or plan the appropriate cloud services model and tech stack for future growth? (IaaS, PaaS, SaaS?)
- ⚠ Migrate existing on-prem infrastructure and systems to the cloud to reduce footprint and costs.
- ⚠ Streamline IT operations and free up existing technical resources to reallocate and support growth initiatives.
- ⚠ Improve cybersecurity stance and threat monitoring.

Ideal For SMBs That Are...

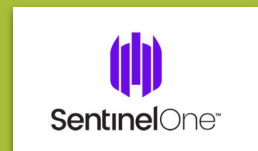

- ✓ Struggling to scale technology to meet business needs
- ✓ Looking to reduce IT footprint & costs
- ✓ Wanting to improve cybersecurity stance
- ✓ Seeking new ways to test and deploy applications
- ✓ Looking for secure and reliable infrastructure to grow for years to come
- ✓ In need of fractional CTO, CIO, CSO support
